BOOKING ESSENTIAL

## Setting up a local fieldwalking or archaeology project

This course provides an introduction on how to start a project to research the archaeology of your local area.

We will look at what techniques can be used to get your project underway and how to take

your research from the archives into the field. We will cover how to find clues in old maps and aerial photographs, as well as where to find information about your area in the Historic Environment Record. There will be an introduction to practical techniques such as fieldwalking, geophysics, and test pitting.

Join local archaeologist Dave Start to find out how you can help to uncover the archaeology of our county.

- **Course title:** Setting up a local fieldwalking or Archaeology project
- **Tutor:** Dave Start
- **Course length:** Two sessions
